

WHAT

Techroad- Human Resource tokenization

Tokenization make current HR service make innovation through matched recommend for reward.

After 10years many other jobs site, we could find job through internet easily.

However, HR market has been growthed, first we don't have nice online service compare with USA.

They have facebook, google, even china they have tencent, xiaomi. Our market is small, without innovation, we can't make competitiveness company, Good company is consist of good human resource, To make global company we must innovate HR service.
